Profile

Computer Science undergraduate passionate about designing intelligent software solutions using Artificial Intelligence and Machine Learning. Experienced in developing full-stack and computer vision applications through academic projects, hackathons, and hands-on learning. Seeking opportunities to contribute to innovative software solutions while continuously expanding my expertise in Artificial Intelligence and Software Development.

Education

KPR Institute of Engineering and Technology

2023–Present

B.E. Computer Science and Engineering

CGPA: 8.05

Technical Skills

Programming: Java, SQL, Python

AI & Machine Learning: TensorFlow, MobileNetV2, OpenCV, Image Processing

Web: HTML, CSS, Flask, React.js

Tools: Git, VS Code

Deployment: Vercel, Render, Hugging Face

Experience

InternPe – Full Stack Developer Intern

Jan 2025–Feb 2025

- Developed responsive web applications using HTML, CSS and JavaScript.
- Integrated frontend interfaces with backend services to enhance application functionality.
- Used Git and GitHub for collaborative version control.
- Improved webpage responsiveness and user experience across desktop and mobile devices.

Projects

AI-Powered Skin Disease Classification

Tech Stack: TensorFlow, MobileNetV2, Flask, OpenCV

- Developed a TensorFlow model to classify 23 skin diseases.
- Applied MobileNetV2 transfer learning for efficient skin disease classification.
- Built a Flask REST API for real-time skin disease prediction.
- Deployed the frontend on Vercel and backend on Hugging Face Spaces for real-time prediction.

Drone-Assisted Disaster Victim Identification

Tech Stack: Python, YOLOv8, OpenCV, Flask

- Developed a real-time victim detection system using YOLOv8 and OpenCV.
- Built a Flask-based web dashboard for monitoring detection results from drone imagery.
- Integrated Telegram notifications to support faster emergency response.
- Improved rescue operations through automated victim detection and real-time visualization.

MedConnect – Offline AI Healthcare Chatbot

Tech Stack: React.js, Electron.js, Ollama, LLaMA 3, SQLite

- Developed an offline AI healthcare assistant powered by LLaMA 3 using Ollama.
- Developed the desktop application using React.js and Electron.js.
- Added multilingual support including Tamil, Hindi and Telugu.
- Enabled offline AI inference using Ollama, eliminating dependency on internet connectivity.

Achievements

- Winner – KPR Ignitron Trophy Hackathon (2024) among 120+ participating teams.
- Top 50 Teams – Smart India Hackathon (2024)
- Finalist – KPR Innovcense (2025)
- First Prize – Paper Presentation at KPRCAS

Certifications

- NPTEL – Introduction to Industry 4.0 and Industrial Internet of Things
